

FARMGATE
STOCKFEEDS

LAMB FINISHING RANGE

Farmgate's lamb finishing range is specially formulated to maximise growth rates and feed efficiency whilst minimising nutritional upsets. Results from feedlot trials conducted by Farmgate Stockfeeds have shown that feeding a grain mix results in an increase of growth rates whilst having lower per head per day consumption of feed. This allows farmers to maximise their return on investment and increase options for marketing animals.

LAMB FINISHER 16%

A high quality blend of cereal grains and legumes that can be purchased crushed or whole. The ration has vitamins and minerals, including buffers (Acid Buf™), rumen modifiers (Bovatec®) and urine acidifier, for control of urinary calculi. Eskalin® can be added.

A free flowing mix that can be augered or fed through troughs, lick feeders or self-feeders.

LAMB PROMIX

A concentrated mix of legumes, vitamins and minerals, including buffers (Acid Buf™), rumen modifiers (Bovatec®) and urine acidifier, for control of urinary calculi. Eskalin® can be added.

Add Farmgate lamb promix to your whole cereal grains to provide an ideal ration for growing and or finishing lambs.

Both mixes are available in bulka bags 800kg and 600kg, bulk in a blower truck or a tipper.
